

EXHAUST SILENCER (MUFFLER)

Although the FUJI Ring Compressors are quiet during operation, there are times when an additional exhaust silencer may be needed. These silencers allow quieter operation of the blowers in environments where noise levels are critical. The exhaust silencer reduces the noise level by approximately 5 dBA.

The Exhaust Silencer is designed for minimal pressure drop and used for discharge inline air service. Constructed from carbon steel with gray powder coat finish for corrosion resistance. Uses an absorptive media packing for industrial duty applications.

Silencer Model	For Use With Blower Model	A Dim. (in.)	B Dim. (in.)	C Dim. (in.)
VFY021A	VFC08-VFC20	12"	2-1/2"	1" NPT-F
VFY023A	VFC30	12"	2-1/2"	1-1/4" NPT-F
